

Energy Efficiency Program Fact Sheet

Mechanical Systems Services

Energy Performance

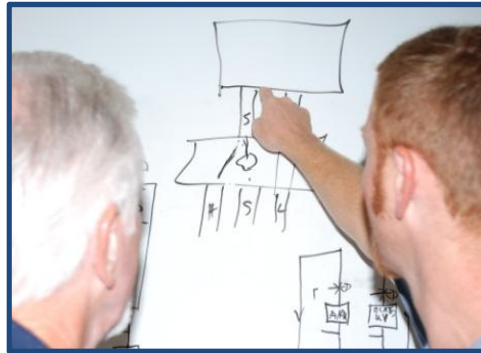

Testing:

We provide operational performance testing of chillers and total chiller plant operations. This includes real time energy efficiency (KW/ton) performance analysis.

With this combined information

we then run computerized performance analysis of the data. This will then allow us to give you a cost/benefit solution maximizing energy efficiency.

As an independent mechanical contractor we recommend the right product for your application based on the results.

Design Build Services:

- **Design Build Projects for**
 - Chilled water
 - Condenser water
 - Direct expansion and airside cooling
- **Specific Expertise includes**
 - Compressor Overhaul
 - Re-tubing
 - Re-gasketing
 - Control Panel Upgrades
 - Compressor Variable Speed Drive Conversions
- **We provide service, repair, and replacement of**
 - Reciprocating and screw chillers
 - Air handling units
 - Centrifugal pumps
 - Cooling towers, and
 - Piping.
